Biological Description

Description	SR17018 is an mu-opioid-receptor (MOR) agonist, binding with GTPγS, with an EC50 of 97 nM.
Targets(IC50)	Opioid Receptor
In vitro	SR17018 acts as an agonist at the mu-opioid receptor (MOR), exhibiting binding affinity with GTP γ S, demonstrated by an EC50 value of 97 nM. It does not significantly induce β arrestin2 recruitment to the MOR at concentrations below 10 μ M, suggesting its mechanism of action primarily involves signaling through G proteins rather than β arrestin2 pathways.
