

PGDS Protein, Human, Recombinant

General Information

Synonyms:	Glutathione-Requiring Prostaglandin D Synthase;PGDS;Glutathione S-Transferase;PTGDS2; GST Class-Sigma;H-PGDS;GSTS;Prostaglandin-H2 D-Isomerase;Hematopoietic Prostaglandin D Synthase;HPGDS;GST Class- σ ;Glutathione-Dependent PGD Synthase
Protein Construction:	Met1-Leu199
Species:	Human
Expression Host:	E. coli
Accession:	O60760
Molecular Weight:	26 KDa (reducing condition)
AA Sequence:	Met1-Leu199

QC Testing

Biological Activity:	Activity has not been tested. It is theoretically active, but we cannot guarantee it. If you require protein activity, we recommend choosing the eukaryotic expression version first.
Purity:	Greater than 95% as determined by reducing SDS-PAGE. (QC verified)
Endotoxin:	< 0.1 ng/ μ g (1 EU/ μ g) as determined by LAL test.
Formulation:	Supplied as a 0.2 μ m filtered solution of 20 mM Tris-HCl, 200 mM NaCl, pH 7.0.

Preparation and Storage

Stability & Storage:

Lyophilized powders can be stably stored for over 12 months, while liquid products can be stored for 6-12 months at -80°C. For reconstituted protein solutions, the solution can be stored at -20°C to -80°C for at least 3 months. Please avoid multiple freeze-thaw cycles and store products in aliquots.

Actual storage temperature shall be subject to the COA.

Shipping:

Proteins are shipped with blue ice.

Protein Background

Hematopoietic Prostaglandin D Synthase (HPGDS) belongs to the GST superfamily and Sigma family. HPGDS contains one GST C-terminal domain and one GST N-terminal domain. HPGDS is highly expressed in adipose tissue, macrophages, and placenta, and it exists in the form of homodimer in living body. HPGDS is a cytosolic enzyme that isomerizes PGH(2). HPGDS is a bifunctional enzyme that catalyzes both the conversion of PGH2 to PGD2 and also shows low glutathione-peroxidase activity towards cumenehydroperoxide.
