

SWELYPLRANL-NH2 TFA

Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Keep away from moisture

Storage:

Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Actual storage temperature shall be subject to the COA.

Biological Description

Description

SWELYPLRANL-NH2 TFA acts as an antagonist to both E-cadherin and N-cadherin, with inhibitory effects on phage clone binding to E- or N-cad/Fc chimeric proteins, exhibiting IC50 values of 0.7 μ M and 0.09 μ M, respectively. Additionally, it disrupts cell aggregation and is utilized to enhance drug delivery by increasing the permeability of epithelial and endothelial barriers [1].
