

eGFP circRNA.

Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Storage:

Keep away from direct sunlight

Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Actual storage temperature shall be subject to the COA.

Biological Description

Description	eGFP circRNA, originally isolated from the jellyfish <i>Aequorea victoria</i> , is a reporter widely utilized for direct detection in mammalian cell culture due to its bright green fluorescence with an emission peak at 509 nm. It serves as an excellent tool for monitoring and optimizing transfection efficiency and is recommended as a positive control for circular RNA transfections.
