

Amyloid β -Protein (3-42)

Chemical Properties

CAS No. : 157884-74-7

Formula:

Molecular Weight:

Keep away from moisture

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Actual storage temperature shall be subject to the COA.

Biological Description

Description	Amyloid β -Protein (3-42), the precursor of Pyr peptide, serves as the foundation of the amyloid template block in Alzheimer's disease when modified to pyroglutamate A β (pEA β) (3-42). This modified form, pEA β (3-42), hastens the aggregation of A β (1-42) although A β (1-42) markedly decelerates both the primary and secondary nucleation of pEA β (3-42) [1].
Targets(IC50)	Beta Amyloid

Inhibitor · Natural Compounds · Compound Libraries · Recombinant Proteins

This product is for Research Use Only · Not for Human or Veterinary or Therapeutic Use
