

## Adipokinetic Hormone (AKH) (24-32), locust TFA

### Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Keep away from moisture

Storage:

Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Actual storage temperature shall be subject to the COA.

### Biological Description

Description	Adipokinetic Hormone (AKH) (24-32), locust (TFA), is a neurohormone extracted from the corpora cardiaca of locusts that regulates lipid utilization during flight [1].
In vitro	In insects, adipokinetic hormone (AKH) peptides are responsible for the endogenous regulation of energy resources.
