

DNA polymerase II large subunit Protein, Cenarchaeum symbiosum, Recombinant

General Information

Synonyms: Exodeoxyribonuclease large subunit; Pol II; polC; DNA polymerase II large subunit

Protein Construction: 287-832 aa

Species: Cenarchaeum symbiosum

Expression Host: E. coli

Accession: A0RYM0

Molecular Weight: 59.0 kDa (predicted)

AA Sequence: LAELKGA VQTGENKEDAAAKRMREVITGRSVLSMPNRLGGFRLRYGRACNTGYTSVGFHPAVAEILDHTIAVG

QC Testing

Biological Activity: Activity has not been tested. It is theoretically active, but we cannot guarantee it. If you require protein activity, we recommend choosing the eukaryotic expression version first.

Purity: > 90% as determined by SDS-PAGE.

Endotoxin: < 1.0 EU/μg of the protein as determined by the LAL method.

Formulation: Tris-based buffer, 50% glycerol

Preparation and Storage

Reconstitution:

A Certificate of Analysis (CoA) containing reconstitution instructions is included with the products. Please refer to the CoA for detailed information.

Stability & Storage:

Lyophilized powders can be stably stored for over 12 months, while liquid products can be stored for 6-12 months at -80°C. For reconstituted protein solutions, the solution can be stored at -20°C to -80°C for at least 3 months. Please avoid multiple freeze-thaw cycles and store products in aliquots.

Actual storage temperature shall be subject to the COA.

Shipping:

In general, lyophilized powders are shipped with blue ice, while solutions are shipped with dry ice.

Protein Background

A DRUG SCREENING EXPERT

Possesses two activities: a DNA synthesis (polymerase) and an exonucleolytic activity that degrades single-stranded DNA in the 3'- to 5'-direction. Has a template-primer preference which is characteristic of a replicative DNA polymerase.
