

Glycoprotein hormones alpha chain Protein, Canine, Recombinant (His & Myc)

General Information

Synonyms:	Thyroid-stimulating hormone alpha chain (TSH-alpha);Anterior pituitary glycoprotein hormones common subunit alpha;Follicle-stimulating hormone alpha chain (FSH-alpha); CGA;Glycoprotein hormones alpha chain;Luteinizing hormone alpha chain (LSH-alpha); Lutropin alpha chain;Follitropin alpha chain;Thyrotropin alpha chain
Protein Construction:	25-120 aa
Species:	Canine
Expression Host:	E. coli
Accession:	Q9XSW8
Molecular Weight:	18.1 kDa (predicted)
AA Sequence:	FPDGFTMQGCPECKLKENKYFSKLGAPIYQCMGCCFSRAYPTPARSKKTM LVPKNITSEATCCVAKAFTKAT VMGNAKVENHTECHCSTCYHKS

QC Testing

Biological Activity:	Activity has not been tested. It is theoretically active, but we cannot guarantee it. If you require protein activity, we recommend choosing the eukaryotic expression version first.
Purity:	> 90% as determined by SDS-PAGE.
Endotoxin:	< 1.0 EU/μg of the protein as determined by the LAL method.
Formulation:	If the delivery form is liquid, the default storage buffer is Tris/PBS-based buffer, 5%-50% glycerol. If the delivery form is lyophilized powder, the buffer before lyophilization is Tris/PBS-based buffer, 6% Trehalose, pH 8.0.

Preparation and Storage

Reconstitution:	Reconstitute the lyophilized protein in sterile deionized water. The product concentration should not be less than 100 μg/mL. Before opening, centrifuge the tube to collect powder at the bottom. After adding the reconstitution buffer, avoid vortexing or pipetting for mixing.
Stability & Storage:	Lyophilized powders can be stably stored for over 12 months, while liquid products can be stored for 6-12 months at -80°C. For reconstituted protein solutions, the solution can be stored at -20°C to -80°C for at least 3 months. Please avoid multiple freeze-thaw cycles and store products in aliquots. <small>Actual storage temperature shall be subject to the COA.</small>
Shipping:	In general, lyophilized powders are shipped with blue ice, while solutions are shipped with dry ice.

Protein Background

A DRUG SCREENING EXPERT

Shared alpha chain of the active heterodimeric glycoprotein hormones thyrotropin/thyroid stimulating hormone/TSH, lutropin/luteinizing hormone/LH and follitropin/follicle stimulating hormone/FSH. These hormones bind specific receptors on target cells that in turn activate downstream signaling pathways.
