

ANAPC15 Protein, Human, Recombinant (GST)

General Information

Synonyms:	Anaphase-promoting complex subunit 15;APC15;ANAPC15;C11orf51
Protein Construction:	1-121 aa
Species:	Human
Expression Host:	E. coli
Accession:	P60006
Molecular Weight:	41.3 kDa (predicted)
AA Sequence:	MSTLFPSLFPRTETLWFLNDRPCVEETELQQQEQQHQAWLQSAIEKDNNLVPIGKPASEHYDDEEEDEDED DEDSEEDSEDDMMDQDMDEMNDYNESPDDGEVNEVDMEGNEQDQDQWMI

QC Testing

Biological Activity:	Activity has not been tested. It is theoretically active, but we cannot guarantee it. If you require protein activity, we recommend choosing the eukaryotic expression version first.
Purity:	> 90% as determined by SDS-PAGE.
Endotoxin:	< 1.0 EU/μg of the protein as determined by the LAL method.
Formulation:	Tris-based buffer, 50% glycerol

Preparation and Storage

Reconstitution:

A Certificate of Analysis (CoA) containing reconstitution instructions is included with the products. Please refer to the CoA for detailed information.

Stability & Storage:

Lyophilized powders can be stably stored for over 12 months, while liquid products can be stored for 6-12 months at -80°C. For reconstituted protein solutions, the solution can be stored at -20°C to -80°C for at least 3 months. Please avoid multiple freeze-thaw cycles and store products in aliquots.

Actual storage temperature shall be subject to the COA.

Shipping:

In general, lyophilized powders are shipped with blue ice, while solutions are shipped with dry ice.

Protein Background

Component of the anaphase promoting complex/cyclosome (APC/C), a cell cycle-regulated E3 ubiquitin ligase that controls progression through mitosis and the G1 phase of the cell cycle. In the complex, plays a role in the release of the mitotic checkpoint complex (MCC) from the APC/C: not required for APC/C activity itself, but promotes the turnover of CDC20 and MCC on the APC/C, thereby participating in the responsiveness of the spindle assembly checkpoint. Also required for degradation of CDC20.
