

## CBX8 Protein, Human, Recombinant (His)

### General Information

Synonyms:	RC1;CBX8;PC3;Polycomb 3 homolog (Pc3;hPc3);Chromobox protein homolog 8;Rectachrome 1
Protein Construction:	1-389 aa
Species:	Human
Expression Host:	E. coli
Accession:	Q9HC52
Molecular Weight:	49.4 kDa (predicted)
AA Sequence:	MELSAVGERVFAAEALLKRRIRKGRMEYLVKWKGSQKYSTWEPEENILDARLLAAFEEREREMELYGPKKR GPKPKTFLKAKAKAKTYEFRSDSARGIRIPYPGRSPQDLASTSRAREGLRNMGLSPPASSTSTSSTCRAEA PRDRDRDRDRDRERDRERERERERERERERERERERERTSRVDDKPSGPDSSKKRGPKPRKELPDPSQRPLGEP SAGLGEYLGKRKLDTPSGAGKFPAGHSVILARRQSDSLVQCGVTSPSSAEATGKLAVDTFFPARVIKHRAAF LEAKGQGALDPNGTRVRHGSGPPSSGGLYRDMGAQGGRPSLIARIPVARILGDPEEESWSPSLTNLEKVVV TDVTSNFLTVTIKESNTDQGFFKEKR

### QC Testing

Biological Activity:	Activity has not been tested. It is theoretically active, but we cannot guarantee it. If you require protein activity, we recommend choosing the eukaryotic expression version first.
Purity:	> 85% as determined by SDS-PAGE.
Endotoxin:	< 1.0 EU/μg of the protein as determined by the LAL method.
Formulation:	If the delivery form is liquid, the default storage buffer is Tris/PBS-based buffer, 5%-50% glycerol. If the delivery form is lyophilized powder, the buffer before lyophilization is Tris/PBS-based buffer, 6% Trehalose, pH 8.0.

### Preparation and Storage

#### Reconstitution:

Reconstitute the lyophilized protein in sterile deionized water. The product concentration should not be less than 100 μg/mL. Before opening, centrifuge the tube to collect powder at the bottom. After adding the reconstitution buffer, avoid vortexing or pipetting for mixing.

#### Stability & Storage:

Lyophilized powders can be stably stored for over 12 months, while liquid products can be stored for 6-12 months at -80°C. For reconstituted protein solutions, the solution can be stored at -20°C to -80°C for at least 3 months. Please avoid multiple freeze-thaw cycles and store products in aliquots.

Actual storage temperature shall be subject to the COA.

#### Shipping:

In general, lyophilized powders are shipped with blue ice, while solutions are shipped with dry ice.

**Protein Background**

Component of a Polycomb group (PcG) multiprotein PRC1-like complex, a complex class required to maintain the transcriptionally repressive state of many genes, including Hox genes, throughout development. PcG PRC1 complex acts via chromatin remodeling and modification of histones; it mediates monoubiquitination of histone H2A 'Lys-119', rendering chromatin heritably changed in its expressibility.
