

## FOxM1 Protein, Human, Recombinant (GST)

### General Information

Synonyms:	Winged-helix factor from INS-1 cells;MPM-2 reactive phosphoprotein 2;Forkhead-related protein FKHL16;FKHL16;WIN;Forkhead box protein M1;M-phase phosphoprotein 2;HFH11;Hepatocyte nuclear factor 3 forkhead homolog 11 (HFH-11;HNF-3/fork-head homolog 11);MPP2;FOXM1;Transcription factor Trident
Protein Construction:	222-360 aa
Species:	Human
Expression Host:	E. coli
Accession:	Q08050
Molecular Weight:	43.8 kDa (predicted)
AA Sequence:	PSRPSASWQNSVSRPPYSYMAMIQFAINSTERKRMTLKDIIYTWIEDHFPYFKHIAKPGWKNSIRHNLSLHD MFVRETSANGKVSFWTIHPSANRYLTDQVFKPLDPGSPQLPEHLESQKRPNPPELRRNMTIKTELP

### QC Testing

Biological Activity:	Activity has not been tested. It is theoretically active, but we cannot guarantee it. If you require protein activity, we recommend choosing the eukaryotic expression version first.
Purity:	> 85% as determined by SDS-PAGE.
Endotoxin:	< 1.0 EU/μg of the protein as determined by the LAL method.
Formulation:	If the delivery form is liquid, the default storage buffer is Tris/PBS-based buffer, 5%-50% glycerol. If the delivery form is lyophilized powder, the buffer before lyophilization is Tris/PBS-based buffer, 6% Trehalose, pH 8.0.

### Preparation and Storage

#### Reconstitution:

Reconstitute the lyophilized protein in sterile deionized water. The product concentration should not be less than 100 μg/mL. Before opening, centrifuge the tube to collect powder at the bottom. After adding the reconstitution buffer, avoid vortexing or pipetting for mixing.

#### Stability & Storage:

Lyophilized powders can be stably stored for over 12 months, while liquid products can be stored for 6-12 months at -80°C. For reconstituted protein solutions, the solution can be stored at -20°C to -80°C for at least 3 months. Please avoid multiple freeze-thaw cycles and store products in aliquots.

Actual storage temperature shall be subject to the COA.

#### Shipping:

In general, lyophilized powders are shipped with blue ice, while solutions are shipped with dry ice.

### Protein Background

## A DRUG SCREENING EXPERT

---

Transcriptional factor regulating the expression of cell cycle genes essential for DNA replication and mitosis. Plays a role in the control of cell proliferation. Plays also a role in DNA breaks repair participating in the DNA damage checkpoint response.
