

CHID1 Protein, Mouse, Recombinant (His & Myc)

General Information

Synonyms: Chitinase domain-containing protein 1;Chid1

Protein Construction: 20-393 aa

Species: Mouse

Expression Host: HEK293 Cells

Accession: Q922Q9

Molecular Weight: 46.9 kDa (predicted)

AA Sequence:

QC Testing

Biological Activity: Activity has not been tested. It is theoretically active, but we cannot guarantee it. If you require protein activity, we recommend choosing the eukaryotic expression version first.

Purity: > 85% as determined by SDS-PAGE.

Endotoxin: < 1.0 EU/μg of the protein as determined by the LAL method.

Formulation: Tris-based buffer, 50% glycerol

Preparation and Storage

Reconstitution:

A Certificate of Analysis (CoA) containing reconstitution instructions is included with the products. Please refer to the CoA for detailed information.

Stability & Storage:

Lyophilized powders can be stably stored for over 12 months, while liquid products can be stored for 6-12 months at -80°C. For reconstituted protein solutions, the solution can be stored at -20°C to -80°C for at least 3 months.

Please avoid multiple freeze-thaw cycles and store products in aliquots.

Actual storage temperature shall be subject to the COA.

Shipping:

In general, lyophilized powders are shipped with blue ice, while solutions are shipped with dry ice.

Protein Background

Saccharide- and LPS-binding protein with possible roles in pathogen sensing and endotoxin neutralization.

Ligand-binding specificity relates to the length of the oligosaccharides, with preference for chitotetraose (in vitro).
