

Vespakinin-M Protein, Vespa mandarinia, Recombinant (His & KSI)

General Information

Synonyms:	Bradykinin-related peptide;Vespakinin-M
Protein Construction:	1-12 aa
Species:	Vespa mandarinia
Expression Host:	E. coli
Accession:	Q7M3T3
Molecular Weight:	16.7 kDa (predicted)
AA Sequence:	GRPPGFSPFRID

QC Testing

Biological Activity:	Activity has not been tested. It is theoretically active, but we cannot guarantee it. If you require protein activity, we recommend choosing the eukaryotic expression version first.
Purity:	> 85% as determined by SDS-PAGE.
Endotoxin:	< 1.0 EU/μg of the protein as determined by the LAL method.
Formulation:	Tris-based buffer, 50% glycerol

Preparation and Storage

Reconstitution:

A Certificate of Analysis (CoA) containing reconstitution instructions is included with the products. Please refer to the CoA for detailed information.

Stability & Storage:

Lyophilized powders can be stably stored for over 12 months, while liquid products can be stored for 6-12 months at -80°C. For reconstituted protein solutions, the solution can be stored at -20°C to -80°C for at least 3 months. Please avoid multiple freeze-thaw cycles and store products in aliquots.

Actual storage temperature shall be subject to the COA.

Shipping:

In general, lyophilized powders are shipped with blue ice, while solutions are shipped with dry ice.

Protein Background

Bradykinins are a potent but short-lived agent of arteriolar dilation and increased capillary permeability. May target bradykinin receptors (BDKRB). May cause hypotension.
