

GBP2 Protein, Human, Recombinant (E. coli, His)

General Information

Synonyms:	Interferon-induced guanylate-binding protein 2;Guanylate-binding protein 2;GTP-binding protein 2 (GBP-2;HuGBP-2);Guanine nucleotide-binding protein 2;GBP2
Protein Construction:	100-259 aa
Species:	Human
Expression Host:	E. coli
Accession:	P32456
Molecular Weight:	22.4 kDa (predicted)
AA Sequence:	GLGDIEKGDNENDSWIFALAILLSSTFVYNSMGTINQQAMDQLHYVTELTDRIKANSSPGNNSVDDSDADFVSF FPAFVWTLRDFTLELEVDGEPITADDYLELSLKLKRGTDKKSFSFNDPRLCIRKFFPKRCKCFVDWPAPKKYLA HLEQLKEEELNPD

QC Testing

Biological Activity:	Activity has not been tested. It is theoretically active, but we cannot guarantee it. If you require protein activity, we recommend choosing the eukaryotic expression version first.
Purity:	> 85% as determined by SDS-PAGE.
Endotoxin:	< 1.0 EU/μg of the protein as determined by the LAL method.
Formulation:	If the delivery form is liquid, the default storage buffer is Tris/PBS-based buffer, 5%-50% glycerol. If the delivery form is lyophilized powder, the buffer before lyophilization is Tris/PBS-based buffer, 6% Trehalose, pH 8.0.

Preparation and Storage

Reconstitution:	Reconstitute the lyophilized protein in sterile deionized water. The product concentration should not be less than 100 μg/mL. Before opening, centrifuge the tube to collect powder at the bottom. After adding the reconstitution buffer, avoid vortexing or pipetting for mixing.
Stability & Storage:	Lyophilized powders can be stably stored for over 12 months, while liquid products can be stored for 6-12 months at -80°C. For reconstituted protein solutions, the solution can be stored at -20°C to -80°C for at least 3 months. Please avoid multiple freeze-thaw cycles and store products in aliquots. <small>Actual storage temperature shall be subject to the COA.</small>
Shipping:	In general, lyophilized powders are shipped with blue ice, while solutions are shipped with dry ice.

Protein Background

Hydrolyzes GTP to GMP in 2 consecutive cleavage reactions, but the major reaction product is GDP. Exhibits antiviral activity against influenza virus. Promotes oxidative killing and delivers antimicrobial peptides to

autophagolysosomes, providing broad host protection against different pathogen classes.
