

Mouse Neutrophil Cell Isolation Kit (negative selection)

Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Storage:

Store at 4°C

Actual storage temperature shall be subject to the COA.

Biological Description

Description

TargetMol's Mouse Neutrophil Cell Isolation Kit (negative selection) provides superparamagnetic beads for the isolation of neutrophils from single-cell suspensions of mouse bone marrow or other tissue samples by negative sorting. The principle is to use different biotin-labelled monoclonal antibodies to label non-target cells, which are then cleared by streptavidin-labelled magnetic beads for the purpose of mouse Neutrophil cell sorting.
