

Human CD3+ T Cell Isolation Kit (negative selection)

Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Storage:

Store at 4°C

Actual storage temperature shall be subject to the COA.

Biological Description

Description

TargetMol's Human CD3+ T Cell Isolation Kit (negative selection) provides superparamagnetic beads for the isolation of CD3+ T cells from human peripheral blood mononuclear cells (PBMC) using a negative sorting method. The principle is to use biotin-labelled monoclonal antibody to label non-target cells (non-CD3+ T cells), and then remove the non-target cells by streptavidin-labelled magnetic beads for the purpose of human peripheral blood CD3+ T cell sorting.
