

Mag Beads Epoxy

Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Storage:

Store at 4°C

Actual storage temperature shall be subject to the COA.

Biological Description

Description

TargetMol Mag Beads Epoxy are superparamagnetic functionalized magnetic microspheres in which reactive epoxy groups are introduced into the outer layer. These epoxy groups are highly reactive and are able to covalently bind to primary amino and primary sulfhydryl groups in proteins and peptides, enabling the coupling of target molecules such as antibodies, peptides, intact proteins, and functional enzymes.
