

GFP Tag Immunoprecipitation Kit

Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Storage: Store at 4°C

Actual storage temperature shall be subject to the COA.

Biological Description

Description

TargetMol's GFP Tag Immunomagnetic Beads specifically bind to proteins with the GFP tag, which can be used for immunoprecipitation (IP) of proteins, protein complexes, protein-nucleic acid complexes, and other antigens. The GFP Tag Immunoprecipitation Kit comes with prepared buffers to provide a relatively better condition for immunoprecipitation and to enhance the stability. This product is suitable for antigen samples from cell lysates, cell culture supernatants, serum, ascites, etc.

Inhibitor · Natural Compounds · Compound Libraries · Recombinant Proteins
