

Protein A Immunomagnetic Beads

Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Storage:

Store at 4°C

Actual storage temperature shall be subject to the COA.

Biological Description

Description

TargetMol's Protein A Immunomagnetic Beads utilize bio-nano surface technology to directionally and densely coat Protein A onto the surface of superparamagnetic microspheres. They are suitable for immunoprecipitation (IP) of proteins, protein complexes, protein-nucleic acid complexes, and other antigens. The recombinant Protein A used in this product is especially suitable for binding mouse IgG2a, IgG2b, IgA, rabbit IgG, and human IgG1, IgG2, and IgG4. This product is compatible with immunoprecipitation reactions involving cell lysates, cell culture supernatants, serum, ascitic fluid, and other biological samples.

Inhibitor · Natural Compounds · Compound Libraries · Recombinant Proteins
