

Monoglyceride lipase

Chemical Properties

CAS No. : 9040-75-9

Formula:

Molecular Weight:

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Actual storage temperature shall be subject to the COA.

Biological Description

Description	Monoglyceridelipase is a crucial enzyme involved in lipid metabolism, catalyzing the hydrolysis of monoglycerides (especially 2-AG, or 2-arachidonoylglycerol) into glycerol and free fatty acids. By regulating the levels of 2-AG, this enzyme impacts neural signaling, pain perception, inflammatory responses, and metabolic processes.
Targets(IC50)	Endogenous Metabolite

Inhibitor · Natural Compounds · Compound Libraries · Recombinant Proteins

This product is for Research Use Only · Not for Human or Veterinary or Therapeutic Use
