

CBI1 formic

Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Actual storage temperature shall be subject to the COA.

Biological Description

Description	CBI1 formic is a covalent inhibitor of BAX, selectively derivatizing BAX at C126 and inhibiting its activation by triggering with a ligand or point mutation. This compound effectively blocks the t-2-hex lipidation and oligomerization of BAX. Additionally, CBI1 formic inhibits BAX activation induced by BH3 ligands, F116A mutations, or t-2-hex.
Targets(IC50)	Bcl-2 Family

Inhibitor · Natural Compounds · Compound Libraries · Recombinant Proteins

This product is for Research Use Only · Not for Human or Veterinary or Therapeutic Use
