

BIMAX2 acetate

Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Keep away from moisture

Storage:

Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Actual storage temperature shall be subject to the COA.

Biological Description

Description	BIMAX2 acetate is a high-affinity peptide for nuclear localization signals (NLS). It mimics the activity of classical NLS (cNLS) by competitively binding to importin α (importin alpha), thereby inhibiting the interaction between cNLS-cargo proteins and importin α . BIMAX2 acetate is utilized in research to explore the role of RBBP4 in regulating nuclear import efficiency and cellular aging.
Targets(IC50)	Ras

Inhibitor · Natural Compounds · Compound Libraries · Recombinant Proteins

This product is for Research Use Only · Not for Human or Veterinary or Therapeutic Use
