

Mibavademab

Chemical Properties

CAS No. : 2305770-44-7

Formula:

Molecular Weight:

Storage: Store at low temperature
-20°C for 1 year

Actual storage temperature shall be subject to the COA.

Biological Description

Description	Mibavademab is a recombinant humanized monoclonal antibody expressed in Chinese Hamster Ovary (CHO) cells that specifically targets the leptin receptor (LEPR/CD295). Mibavademab is composed of a human IgG4SP hinge-stabilized heavy chain and a human kappa (huk) light chain, possesses a predicted molecular weight of 145.58 kDa. Mibavademab can be used in studies about the treatment of congenital leptin deficiency.
Targets(IC50)	Neuropeptide Y Receptor

Inhibitor · Natural Compounds · Compound Libraries · Recombinant Proteins

This product is for Research Use Only · Not for Human or Veterinary or Therapeutic Use
