

Anti-Myc Tag Antibody-HRP (2E237)

Product Details

Ig Type:	Mouse IgG1
Reactivity:	other
Conjugation:	HRP
Clone:	2E237
Purification:	Protein A

Applications

Application:	ELISA
Recommended	ELISA: 0.1-1 µg/ml

Properties

Stability & Storage:	Store at 2°C-8°C for 1 month. Store at -20°C or -80°C for 12 months. Avoid repeated freeze-thaw cycles. Preservative-Free. Keep away from direct sunlight.
Shipping:	Shipping with blue ice.

Antigen Details

Immunogen:	A synthetic peptide: Myc tag peptide conjugated to KLH
Antigen Species:	Other

Research Background

The Myc tag is a popular protein tag derived from c-myc gene product with a molecular weight of 1.2 KDa. The amino acid sequence is EQKLISEEDL, corresponding to the C-terminal amino acids (410-419) of human c-myc protein. Anti-Myc Tag antibodies can facilitate the detection, separation and purification of Myc tag target proteins without protein-specific antibodies or probes in several immunochemical assays such as Western Blotting, ELISAs and immunostaining techniques.
