

Anti-LY75/CD205 Antibody (7F139)

Product Details

Ig Type:	Rabbit IgG
Reactivity:	Mouse
Conjugation:	Unconjugated
Clone:	7F139
Purification:	Protein A

Applications

Verified Activity:	Anti-S Tag rabbit monoclonal antibody at 1:1000 dilution. -Lane A: S tag-GFERh(C) transfected 293 cell lysate at 1µg -Secondary -Goat Anti-Rabbit IgG (H+L)/HRP at 1/10000 dilution. -Developed using the ECL technique. -Performed under reducing conditions.
Application:	WB
Recommended	WB: 1:500-1:2000

Properties

Stability & Storage:	Store at 2°C-8°C for 1 month. Store at -20°C or -80°C for 12 months. Avoid repeated freeze-thaw cycles. Preservative-Free.
Shipping:	Shipping with blue ice.

Antigen Details

Immunogen:	A synthetic peptide: N-terminus of the Mouse DEC-205 / LY75
Antigen Species:	Mouse
Synonyms:	CLEC13B;Ly-75;GP200-MR6;DEC-205;CD205;LY75

Research Background

LY75 (Lymphocyte Antigen 75) is a Protein Coding gene. It is broadly expressed in the lymph node, appendix, and other tissues. LY75 knockdown in SKOV3 cells resulted in predominant upregulation of functional pathways implicated in cell proliferation and metabolism, while pathways associated with cell signaling and adhesion, complement activation, and immune response were mostly suppressed. Moreover, LY75 suppression had an opposite effect on EOC cell lines with the epithelial phenotype (A2780s and OV2008), by directing epithelial-to-mesenchymal transition (EMT) associated with reduced capacity for in vivo EOC cell colonization, as similar/identical signaling pathways were reversely regulated, when compared to mesenchymal LY75 knockdown EOC cells. Diseases associated with LY75 include Pneumonic Plague and Adenoiditis.
