

Anti-ALDH7A1 Antibody (6G475)

Product Details

Ig Type:	Mouse IgG1
Reactivity:	Human
Conjugation:	Unconjugated
Clone:	6G475
Purification:	Protein A

Applications

Verified Activity:	1. Immunochemical staining of human ALDH7A1 in human hepatoma with mouse monoclonal antibody (1:60, formalin-fixed paraffin embedded sections). 2. Immunochemical staining of human ALDH7A1 in human cirrhosis with mouse monoclonal antibody (1:60, formalin-fixed paraffin embedded sections). The image showing positive staining of hepatocyte.
Application:	IHC-P
Recommended	IHC-P: 1:50-1:200

Properties

Stability & Storage:	Store at 2°C-8°C for 1 month. Store at -20°C or -80°C for 12 months. Avoid repeated freeze-thaw cycles. Preservative-Free.
Shipping:	Shipping with blue ice.

Antigen Details

Immunogen:	Recombinant Protein: Human ALDH7A1 protein (TMPY-01588)
Antigen Species:	Human
Synonyms:	ATQ1;aldehyde dehydrogenase 7 family, member A1;EPD;PDE

Research Background

ALDH7A1 (Aldehyde dehydrogenase 7 family, member A1) is a member of subfamily 7 in the aldehyde dehydrogenase family. These enzymes are thought to play a major role in the detoxification of aldehydes generated by alcohol metabolism and lipid peroxidation. Mammalian ALDH7A1 is homologous to plant ALDH7B1 which protects against various forms of stress such as increased salinity, dehydration and treatment with oxidants or pesticides. In mammals, ALDH7A1 is known to play a primary role during lysine catabolism through the NAD⁺-dependent oxidative conversion of amino adipate semialdehyde (AASA) to its corresponding carboxylic acid, α -amino adipic acid. Deleterious mutations in human ALDH7A1 are responsible for pyridoxine-dependent and folinic acid-responsive seizures. ALDH7A1 is a novel aldehyde dehydrogenase expressed in multiple subcellular compartments that protects against hyperosmotic stress by generating osmolytes and metabolizing toxic aldehydes.
