

Anti-CD155/PVR Antibody-PE (9R440)

Product Details

Ig Type:	Rabbit IgG
Reactivity:	Mouse
Conjugation:	PE
Clone:	9R440
Purification:	Protein A

Applications

Verified Activity:	Analysis of PVR(CD155) expression on Raw264.7 cells. The cells were treated with Mouse BD Fc Block™ purified anti-CD16/CD32 mAb 2.4G2 and stained with PE-conjugated anti-Mouse PVR (CD155). The histogram were derived from the gated events based on light scattering characteristics of viable cells.
Application:	FCM
Recommended	10 µl/Test, 0.1 mg/ml

Properties

Stability & Storage:	Store at 2°C-8°C for 12 months, do not freeze. Keep away from direct sunlight.
Shipping:	Shipping with blue ice.

Antigen Details

Immunogen:	Recombinant Protein: Mouse CD155 protein (TMPY-00762)
Antigen Species:	Mouse
Synonyms:	TAGE4;PVS;poliovirus receptor;Necl-5;NECL5;CD155;HVED
Biology Area:	Cancer Drug Targets

Research Background

CD155, commonly known as PVR (poliovirus receptor) and Necl-5 (nectin-like molecule-5), is a type I transmembrane single-span glycoprotein, and belongs to the nectins and nectin-like (Necl) subfamily. CD155 was originally identified based on its ability to mediate the cell attachment and entry of poliovirus (PV), an etiologic agent of the central nervous system disease poliomyelitis. The normal cellular function is in the establishment of intercellular adherens junctions between epithelial cells. CD155 may assist in an efficient humoral immune response generated within the intestinal immune system. It has been demonstrated that CD155 can be recognized and bond by DNAM-1 and CD96 which promote the adhesion, migration and NK-cell killing, and thus efficiently prime cell-mediated tumor-specific immunity.
