

Anti-CD86 Antibody-APC (5D537)

Product Details

Ig Type:	Mouse IgG2b
Reactivity:	Rat
Conjugation:	APC
Clone:	5D537
Purification:	Protein A

Applications

Verified Activity:	Flow cytometric analysis of rat CD86 expression on LPS-stimulated SD rat splenocytes. Cells were stained with APC-conjugated anti-rat CD86. The fluorescence histograms were derived from gated events with the forward and side light-scatter characteristics of intact cells.
Application:	FCM
Recommended	10 µl/Test, 0.1 mg/ml

Properties

Stability & Storage:	Store at 2°C-8°C for 12 months, do not freeze. Keep away from direct sunlight.
Shipping:	Shipping with blue ice.

Antigen Details

Immunogen:	Recombinant Protein: Rat CD86 Protein (TMPY-02016)
Antigen Species:	Rat
Synonyms:	B7-2;CD28LG2;B7.2;LAB72;CD86 antigen;B70
Biology Area:	Cancer Drug Targets

Research Background

CD86, also known as B-lymphocyte activation antigen B7-2 (referred to as B70), is a member of the cell surface immunoglobulin superfamily. B7-2 exists predominantly as a monomer on cell surfaces and interacts with two co-stimulatory receptors CD28 and cytotoxic T lymphocyte-associated antigen 4 (CTLA-4) expressed on T cells, and thus induces the signal pathways which regulate T cell activation and tolerance, cytokine production, and the generation of CTL. It is indicated that contacts between B and T helper cells mediated by CD86 encourage signals for the proliferation and IgG secretion of normal B cells and B cell lymphomas. A recent study has revealed that CD86 also promotes the generation of a mature APC repertoire and promotes APC function and survival. CD86 has an important role in chronic hemodialysis, allergic pulmonary inflammation, arthritis, and antiviral responses, and thus is regarded as a promising candidate for immune therapy.
