

Melamine-Bov IgG

Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Actual storage temperature shall be subject to the COA.

Biological Description

Description	Melamine-Bov IgG is a hapten-carrier protein conjugate formed by coupling Melamine to bovine immunoglobulin (bovigG). As a hapten, Melamine alone cannot induce an immune response and must be conjugated to a large molecular protein to become a complete antigen with immunogenicity. Melamine-Bov IgG may be supplied as a lyophilized powder or as a solution. The solution is prepared in 0.01M TBS (pH 7.4) buffer.
Targets(IC50)	Drug Metabolite

Inhibitor · Natural Compounds · Compound Libraries · Recombinant Proteins

This product is for Research Use Only· Not for Human or Veterinary or Therapeutic Use
