

T3-BSA

## Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Actual storage temperature shall be subject to the COA.

## Biological Description

Description

T3-BSA is a hapten-carrier protein conjugate formed by coupling T3 (thyroxine) to bovine serum albumin (BSA). As a hapten, T3 alone cannot induce an immune response and must be conjugated to a large molecular protein to become a complete antigen with immunogenicity.
