

## Diethylstilbestrol-KLH

### Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Actual storage temperature shall be subject to the COA.

### Biological Description

Description

Diethylstilbestrol-KLH is a hapten-carrier protein conjugate formed by coupling Diethylstilbestrol to keyhole limpet hemocyanin (KLH). As a hapten, Diethylstilbestrol alone cannot induce an immune response and must be conjugated to a large molecular protein to become a complete antigen with immunogenicity. Diethylstilbestrol-KLH may be supplied as a lyophilized powder or as a solution. The solution is prepared in 0.01M TBS (pH 7.4) buffer at a typical concentration of 1mg/mL.
