

## Type IX collagen (from bovine articular cartilage)

### Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Actual storage temperature shall be subject to the COA.

### Biological Description

Description	Type IX collagen (from bovine articular cartilage) is a highly purified protein that can stimulate the immune system in animals to produce specific antibodies against this collagen. Additionally, collagen acts as a substrate for matrix metalloproteinases (MMP).
Targets(IC50)	MMP

**Inhibitor · Natural Compounds · Compound Libraries · Recombinant Proteins**

This product is for Research Use Only · Not for Human or Veterinary or Therapeutic Use
