

Type II collagen (from rat sternal cartilage)

Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Actual storage temperature shall be subject to the COA.

Biological Description

Description	Type II collagen (from rat sternal cartilage) is a highly purified collagen extracted from rat sternal cartilage. It can stimulate the immune system in animals to produce specific antibodies against this collagen. Additionally, this collagen serves as a substrate for the hydrolysis by matrix metalloproteinases (MMP).
Targets(IC50)	MMP

Inhibitor · Natural Compounds · Compound Libraries · Recombinant Proteins

This product is for Research Use Only · Not for Human or Veterinary or Therapeutic Use
