

Type IX collagen (from chick articular cartilage)

## Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Actual storage temperature shall be subject to the COA.

## Biological Description

Description	Type IX collagen (from chick articular cartilage) is a collagen protein capable of stimulating the immune system of animals to produce specific antibodies against it. Additionally, this collagen serves as a hydrolytic substrate for MMP.
Targets(IC50)	MMP

**Inhibitor · Natural Compounds · Compound Libraries · Recombinant Proteins**
