

Recombinant Humanized Type XVII Collagen

Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Actual storage temperature shall be subject to the COA.

Biological Description

Description	Recombinant Humanized Type XVII Collagen is a transmembrane protein that forms hemidesmosomes. It facilitates interactions between stem cells, surrounding cells, and the extracellular matrix, thereby regulating skin homeostasis, aging, and wound healing. Additionally, Recombinant Humanized Type XVII Collagen has distinct cell adhesion sites and signal transduction capabilities, which can modulate cell migration, proliferation, and differentiation.
Targets(IC50)	Others
