

Soy Polysaccharides

Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Actual storage temperature shall be subject to the COA.

Biological Description

Description	SoyPolysaccharides is a multifunctional biochemical reagent that is non-toxic, hydrophilic and biodegradable, and is suitable for a variety of scenarios in the food industry. It can not only be used as a thickener and emulsifier in beverages, sauces and dairy products, but also as a dietary fiber component. In addition, it exhibits excellent stability in oil/water emulsion systems, especially under acidic conditions, and can effectively prevent flocculation of β -conglycinin-based emulsions.
Targets(IC50)	Others

Inhibitor · Natural Compounds · Compound Libraries · Recombinant Proteins

This product is for Research Use Only· Not for Human or Veterinary or Therapeutic Use
