

ST3 β -Gal α -2,3-Sialyltransferase 6

Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Actual storage temperature shall be subject to the COA.

Biological Description

Description	ST3 beta-Gal alpha-2,3-Sialyltransferase 6 (EC:2.4.99., ST3GAL6; SIAT10, Type 2 lactosamine alpha-2,3-sialyltransferase) is responsible for transferring sialic acid from activated cytidine 5'-monophospho-N-acetylneuraminic acid to terminal positions on sialylated glycolipids (gangliosides) or to N- or O-linked glycans on glycoproteins. This enzyme plays a significant role in cancer.
Targets(IC50)	Others

Inhibitor · Natural Compounds · Compound Libraries · Recombinant Proteins

This product is for Research Use Only · Not for Human or Veterinary or Therapeutic Use
