

Fucosyltransferase 7

Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Actual storage temperature shall be subject to the COA.

Biological Description

Description	Fucosyltransferase 7 (FUT7) is a Golgi stack membrane protein. It catalyzes the final fucosylation step in the synthesis of Lewis antigens, resulting in the production of the specific glycosylated product sialyl Lewis X (sLeX). FUT7 is involved in catalyzing the α -1,3 glycosidic bond, which is crucial for sialyl Lewis X antigen expression.
Targets(IC50)	Others

Inhibitor · Natural Compounds · Compound Libraries · Recombinant Proteins

This product is for Research Use Only · Not for Human or Veterinary or Therapeutic Use
