

Protamine from salmon

Chemical Properties

CAS No. : 9012-00-4

Formula:

Molecular Weight:

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Actual storage temperature shall be subject to the COA.

Biological Description

Description	Protamine from salmon is a biochemical reagent with antioxidant, anti-heparin, and antimicrobial properties. It can neutralize the anticoagulant effect of heparin, preventing the formation of antithrombin complexes in canine samples pretreated with heparin in vitro.
Targets(IC50)	Antibacterial,Thrombin

Inhibitor · Natural Compounds · Compound Libraries · Recombinant Proteins

This product is for Research Use Only· Not for Human or Veterinary or Therapeutic Use
