

Methyl cellulose(Viscosity:25mPa.s)

## Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Actual storage temperature shall be subject to the COA.

## Biological Description

|               |                                                                                                                                                                             |

| Description   | Methyl cellulose (Viscosity: 25 mPa.s) (MC (Viscosity: 25 mPa.s)) is a thickening agent. It can be utilized as a biomaterial or organic compound in life sciences research. |
| Targets(IC50) | Others                                                                                                                                                                      |
