

Digoxin-OVA

Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Storage:

Pure form: -20°C for 3 years | In solvent: -80°C for 1 year

Actual storage temperature shall be subject to the COA.

Biological Description

Description	Digoxin-OVA is a hapten-carrier protein conjugate formed by coupling Digoxin to chicken ovalbumin (OVA). As a hapten, Digoxin alone cannot induce an immune response and must be conjugated to a large molecular protein to become a complete antigen with immunogenicity. Digoxin-OVA may be supplied as a lyophilized powder or as a solution. The solution is prepared in 0.01M PBS (pH 7.4) buffer at a typical concentration of 1mg/mL.
Targets(IC50)	ATPase,Endogenous Metabolite

Inhibitor · Natural Compounds · Compound Libraries · Recombinant Proteins

This product is for Research Use Only· Not for Human or Veterinary or Therapeutic Use
