

Anti-Fibronectin Antibody (8U653)

Product Details

Reactivity:	Human
Conjugation:	Unconjugated
Molecular Weight:	Actual: 262 kDa.
Clone:	8U653
Purification:	Affinity purification using immunogen.

Applications

Verified Activity: 1. Western blot analysis of Hela cells, using TMAC-01484 diluted at 1:2,000.

Application:	IHC,WB
Recommended	WB: 1:1000-2000

Properties

Stability & Storage:	Store at -20°C or -80°C for 12 months. Avoid repeated freeze-thaw cycles.
Shipping:	Shipping with blue ice.

Antigen Details

Uniprot ID:	P02751
Synonyms:	FN1;Fibronectin

Research Background

Fibronectin is a high-molecular weight glycoprotein of the extracellular matrix that binds to membrane-spanning receptor proteins called integrins. Similar to integrins, fibronectin binds extracellular matrix components such as collagen. Fibronectin exists as a protein dimer, consisting of two nearly identical monomers linked by a pair of disulfide bonds. The fibronectin protein is produced from a single gene, but alternative splicing of its pre-mRNA leads to the creation of several isoforms.
