

## Anti-Phospho-IKK-epsilon (Ser172) Polyclonal Antibody

### Product Details

|                   |                                                                                                                                                                                                                                                                                      |
|-------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Ig Type:          | IgG                                                                                                                                                                                                                                                                                  |
| Reactivity:       | Human,Mouse                                                                                                                                                                                                                                                                          |
| Conjugation:      | Unconjugated                                                                                                                                                                                                                                                                         |
| Molecular Weight: | Theoretical: 80 kDa.                                                                                                                                                                                                                                                                 |
| Purification:     | Antibodies were produced by immunizing rabbits with synthetic phosphopeptide and KLH conjugates. Antibodies were purified by affinity-chromatography using epitope-specific phosphopeptide. Non-phospho specific antibodies were removed by chromatography using non-phosphopeptide. |

### Applications

|              |            |
|--------------|------------|
| Application: | WB         |
| Recommended  | WB: 1:1000 |

### Properties

|                      |                                                                           |
|----------------------|---------------------------------------------------------------------------|
| Stability & Storage: | Store at -20°C or -80°C for 12 months. Avoid repeated freeze-thaw cycles. |
| Shipping:            | Shipping with blue ice.                                                   |

### Antigen Details

|                  |                                                                                         |
|------------------|-----------------------------------------------------------------------------------------|
| Immunogen:       | A synthesized phosphopeptide: human IKK-ε around the phosphorylation site of Ser172     |
| Antigen Species: | Human                                                                                   |
| Uniprot ID:      | Q14164                                                                                  |
| Synonyms:        | p-IKK-epsilon (S172);IKK-epsilon (p-Ser172);p-IKK-epsilon (Ser172);IKK-epsilon (p-S172) |
