

ADPG Pyrophosphorylase Assay Kit (UV Spectrophotometry)

Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Storage: Powder -20°C for 3 years
In solvent -80°C for 2 years

Actual storage temperature shall be subject to the COA.

Biological Description

Description

ADP-glucose pyrophosphorylase (ADPase, AGP) (EC 2.7.7.21) is a rate-limiting enzyme for starch synthesis in plants and glycogen synthesis in microorganisms. It catalyzes the reaction in which glucose-1-phosphate reacts with ATP to form ADP-glucose (ADPG) with the release of energy. Understanding AGPase is of great value for studying starch content.

Inhibitor · Natural Compounds · Compound Libraries · Recombinant Proteins
