

AH Assay Kit (Spectrophotometry)

Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Storage: Powder -20°C for 3 years
In solvent -80°C for 2 years

Actual storage temperature shall be subject to the COA.

Biological Description

Description

Cytochrome P450 enzymes are a group of isozymes mainly present in the liver, which play an important role in the metabolism of exogenous substances, especially the metabolism of drugs and toxicants. Aniline-4-hydroxylase (AH) corresponds to the CYP2E1 subtype in the P450 enzyme system. CYP2E1 not only participates in drug metabolism but also catalyzes the activation process of various procarcinogens and protoxicants.
