

WEHI-3773

Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Actual storage temperature shall be subject to the COA.

Biological Description

Description	WEHI-3773 is an inhibitor of the interaction between VDAC2 and either BAK or BAX. It prevents BAX-mediated apoptosis (Apoptosis) by blocking the recruitment of BAX to the mitochondria through VDAC2. Conversely, WEHI-3773 promotes BAK-mediated apoptosis (Apoptosis) by limiting VDAC2's inhibitory sequestration of BAK. This compound shows promise for research in the field of cancer therapy.
Targets(IC50)	Apoptosis,Bcl-2 Family

Inhibitor · Natural Compounds · Compound Libraries · Recombinant Proteins

This product is for Research Use Only· Not for Human or Veterinary or Therapeutic Use
