

NK7-902

Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Actual storage temperature shall be subject to the COA.

Biological Description

Description	NK7-902 is a CRBN molecular glue degrader of NEK7. It fully degrades NEK7 in human primary monocytes and whole blood, yet only partially inhibits NLRP3-dependent IL-1 β production. NK7-902 results in profound and lasting degradation of NEK7, but only temporarily blocks NLRP3 inflammasome activation in non-human primates via oral administration. The compound demonstrates activity in mouse systems.
Targets(IC50)	MAPK

Inhibitor · Natural Compounds · Compound Libraries · Recombinant Proteins
