

MAGE-A1-derived peptide acetate

Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Keep away from moisture

Storage:

Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Actual storage temperature shall be subject to the COA.

Biological Description

Description	MAGE-A1-derived peptide acetate is a short peptide sequence originating from the MAGE-A1 protein. As a tumor-specific antigen, it can be recognized and activated by cytotoxic T lymphocytes (CTLs), inducing an immune response against tumor cells expressing MAGE-A1. This immune reaction can result in the lysis and death of tumor cells. MAGE-A1-derived peptide acetate is utilized in tumor immunology research.
Targets(IC50)	Others

Inhibitor · Natural Compounds · Compound Libraries · Recombinant Proteins

This product is for Research Use Only · Not for Human or Veterinary or Therapeutic Use
