

Phaseolus vulgaris Lectin-M

Chemical Properties

CAS No. :

Formula:

Molecular Weight:

Storage: Powder: -20°C for 3 years | In solvent: -80°C for 1 year

Actual storage temperature shall be subject to the COA.

Biological Description

Description

Phaseolus vulgaris Lectin-M is an adhesive protein form of plant lectin. It is primarily used to stimulate the proliferation of peripheral mononuclear cells, enhance the production of certain cytokines, and promote the expression of surface membrane proteins.
