

Rabbit Anti-Human IgA Secondary Antibody

Product Details

Ig Type:	IgG
Reactivity:	Human
Purification:	Protein A purified

Applications

Application:	ELISA
Recommended	ELISA: 1:2000-10000

Properties

Stability & Storage:	Store at -20°C or -80°C for 2 years (lyophilized powder). Avoid repeated freeze-thaw cycles.
Shipping:	Shipping with blue ice.

Antigen Details

Immunogen:	Native Human IgA
Synonyms:	Human Immunoglobulin A;hu IgA

Research Background

Monomeric IgA constitutes 5-15 % of the serum immunoglobulins whereas dimeric IgA is localized to mucosa surfaces such as saliva, gastrointestinal secretion, bronchial fluids and milk. Mucosal IgA plays a major role in host defence by neutralising infectious agents at mucosal surfaces. The production is usually local and antigen specific IgA producing B-cells can be found in regions under the lamina propria where they mature into dimeric IgA producing plasma cells. IgA deficiency is the most common immunodeficiency that may affect both serum and mucosal produced IgA.
